Today I ran some prompts in DALL-E mini for fun.
This is a program that takes whatever you type and turns it into 9 different AI-generated images.

Check it out! The results are definitely not perfect, but it's getting there. Kind of spooky that you can tell exactly what I asked for, even if you have to blur your eyes and squint a little. Haha.

Some Youtubers that I follow recently came out with videos reviewing DALL-E 2 and I found it incredibly fascinating. DALL-E 2 probably won't be open to the public for a while, so you'll have to join the wait-list or be satisfied with the older generations of it.

You too can mess around with DALL-E mini here: <https://huggingface.co/spaces/dalle-mini/dalle-mini>
